THE DKE CIVIL WAR — OLD DKE VS NEW DKE

Faction battle; combined points, all six teams each side. Fun fact: the scoring system hands out exactly 65 points every tournament — this is a zero-sum war, and the margin is always odd, so the moneyline can't push.

HOW THE SAUSAGE IS MADE. Team strengths are calibrated so that simulated championship probabilities match the consensus of real sportsbooks (DraftKings · FanDuel · Kalshi · ESPN consensus, June 2026 (devigged)). The full 2026 World Cup — real FIFA bracket, best-eight third-place advancement — was simulated 400,000 times. Pool scoring per the official World Cup Lotto '26 rules: 1 pt for making the Round of 32, 2 for the Round of 16, 3 for the quarters, 4 for the semis, 5 for losing the final, 8 for the champion (each team counts once, at its furthest stage).

HOUSE RULES. All prices include the house's margin. Dead heats split stakes and payouts. All lines subject to movement; the book closes at kickoff of the opener, June 11.
